-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Objections

1. Claim 8 is objected to because of the following informalities: this claim lists edges of the reinforcing metal-layer parts as including numeral 9 and 10 in line 2, however 9, 10 are parts of the metal layers (3-6) not the reinforcing metal-layer 16. Appropriate correction is required.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-3, 8 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Roebroeks 2007/0116906. The reference discloses a joining structure comprising metal layers 1-3 and plastic layers 6, 7 wherein the metal layers have overlapping jogged joints which are offset from each other; see the Figure, [008] and [0011]. One of these metal layers 1-3, such as layer 2 or 3, can be considered to be a "reinforcing metal-layer" with a pair of overlapping edges located outside the joining region of the other two sets of layers 1 and 2. However, the reference does not use three metal layers in addition to the reinforcing metal-layer. It would have been obvious to one of ordinary skill in the art to add additional metal layers to the laminate of the reference to provide more strength to the product for a particular end use since a mere duplication of parts is within the level of ordinary skill in the art. Concerning claim 8, the overlapping

edges 11 of the metal layers in the product of the reference are of different sizes as shown in the Figure.

Allowable Subject Matter

4. Claims 4-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alexander Thomas whose telephone number is 571-272-1502. The examiner can normally be reached on 6:30-4:00 M-THUR.
